

METHOD AND SYSTEMS FOR ACCESSING FINANCIAL PROSPECTUS DATA

Methods and systems for accessing prospectus 5 data are provided. These methods and systems utilize electronically readable media incorporated into a printed financial prospectus to provide access to data in an electronic format. A suitable device may then be used to read data from the electronically readable media and store the data on a computer system. The 10 information provided by the prospectus therefore contains both human-readable and electronically readable information. The data may be provided in a summary form, in a standardized form, or in any other 15 suitable form in order to facilitate subsequent analysis of the data. The data may also be encrypted while stored in the electronically readable media.
